Public Briefing Paper for

Forest Management & Chain of Custody with Controlled Wood
FSC Certification Annual Audits 2013
of
Norske Skog Paper Mills (Australia) Ltd
in Tasmania

June 11, 2013

Introduction
The Rainforest Alliance is conducting both the Forest Management/Chain of Custody (FM/CoC) and the Chain of custody and Controlled Wood (CoC/CW) Annual Audits 2013 of Norske Skog Paper Mills (Australia) Ltd. The forest area under the scope of the certificate (SW-FM/COC-005388) is located in Tasmania, with a total certified area of 27,825 hectares. This figure includes mainly Pinus Radiata plantations in Southern Tasmania but also Eucalyptus Nitens plantation and about 8,400 has of natural forest. The forest area under the scope of Norske Skog's FSC CoC-CW certificate (SW-COC/CW-005501) is located across Tasmania.

At the Annual Audit 2013, the audit team will visit a sample of sites from the 8th to the 12th of July, 2013.

Scope of the Annual Audit 2013
The forest management certification audit will assess the environmental, silvicultural and socioeconomic aspects of the forests and plantations managed by Norske Skog, using the Rainforest Alliance Interim Standard for Assessing Forest Management in Australia (version June 2008) and FM-35 Rainforest Alliance Chain-of-Custody Standard for Forest Management Enterprises (FMEs) February 2009. To obtain a copy of the applicable guidelines or to make comments about these standards, please contact Rainforest Alliance by telephone, fax, email or website listed below. Please note that the standard may be modified to take account of stakeholder comments. Rainforest Alliance is accredited by the Forest Stewardship Council™ (FSC®) and this assessment process must follow procedures which have been approved by the FSC.

The forest under evaluation contains about 3,525 hectares either identified as High Conservation Value Forests or where high conservation values, as defined by the FSC, are likely found. In particular, belonging to forest areas that are in or contain rare, threatened or endangered ecosystems (HCV3) and forest areas that provide basic services of nature in critical situations (e.g. watershed protection, erosion control) (HCV4) and also including a number of identified aboriginal and historic sites.
Rainforest Alliance evaluates the identification, management and protection of these High Conservation Values and solicits related comments from stakeholders.

The CoC-CW surveillance audit will evaluate the organization’s CoC and CW system including High Conservation Value aspects of the forest management units managed by Norske Skog’s suppliers using FSC standards FSC-STD-40-004 and FSC-STD-40-005.

Audit Team Composition – The FM/COC audit team will be led by Mrs. Malory Weston (BSc, MSc Botany, Aquatic and Terrestrial Ecology), and will include Mr. Addis Tsehaye, (PhD & MSc Forestry). The COC/CW audit team will include only Mr Addis Tsehaye as Lead Auditor.

Audit Steps and Schedule – Following is a short description of the certification process and a tentative agenda:

♦ Audit organization – The audit team will assemble at the Norske Skog Head Office in New Norfolk on the 8th of July, 2013.
♦ Field visits – The team will visit sites managed by Norske Skog in Tasmania during the 9th through 12th of July, 2013.
♦ Stakeholder consultation – Throughout the fieldwork, the team will contact local stakeholders regarding Norske Skog forest management in towns surrounding the forest area. This may include private interviews and discussions, and public stakeholder meetings.
♦ Final audit briefing – On the 10th of July (for FM/CoC) and 12th of July (for CoC/CW), the team will meet with Norske Skog managers to finalize their data collection and present preliminary findings.
♦ Draft report production – The audit team will produce a confidential draft report that will be submitted for comment to Norske Skog as well as internal Rainforest Alliance reviewers.
♦ Certification decision – Upon receipt of comments on the draft report from Norske Skog forest managers and reviewers, and other general stakeholders comments, Rainforest Alliance will reach a certification decision. Barring unforeseen obstacles, this should occur by mid August 2013.

Your Input Sought – As a part of the forest certification process we invite stakeholders to offer comment and feedback on Norske Skog forest management in relation to compliance with the requirements of the forest management standard referenced above as well as comments on the management and protection of High Conservation Values within the forest under evaluation. We welcome input, either public or confidential, in whatever form is easiest and most secure for you. Your input will be valuable at any stage of the process, but we would prefer to receive your comments either prior to the Audit, during the Audit, or prior to 12th of July so that we can take them into consideration in reaching a certification decision. Your options for communicating your observations to us are as follows:

1. Meet with a Rainforest Alliance audit team member during or shortly after the fieldwork. Please, contact Lead Auditor Mrs. Malory Weston for arrangements.
2. Call and give comments to Anita Neville, Representative of the Rainforest Alliance in Australia. If this person is not in the office, please contact Task Manager, Maria R Gismero for FM certification and Rocky Iskandar for CoC with CW certification.
3. Submit written comments by mail, fax or email to Anita Neville. Unless you request otherwise, these comments will be kept confidential and are solely for the purposes of assessing Norske Skog.

FM-44 2 March 2012
The source of any information provided will be kept confidential available to only the FSC and Rainforest Alliance staff.

Stakeholders who may wish to dispute any aspect of the forest certification process or decision can access Rainforest Alliance’s Complaints, Appeals and Dispute resolution procedures at www.rainforest-alliance.org.
